FORMULA regulates the spermatic metabolism during the preservation and provides energy for the fecundation.

The stable chemical-physical environment through the time provides a new technology of controlled energy release.

The FORMULA extenders product line has been realized with patented technology. This is the result of a collaboration between Medi Nova’s R&D department and the Departments of Pharmacy and Veterinary Sciences of University of Parma.

Its buffer capability ensures the maintenance during preservation of an optimal level of pH; osmolarity is controlled.

Do not contain substances of animal origin
Do not contain tensoactives
Do not produce foam

In the form of a new component (MODULAR ACTIVATOR), FORMULA contains an efficient combination of selected antibiotics that guarantee the elimination of bacterial contamination, indispensable for a good doses preservation.

New technology of controlled energy release.

The presence of a new component (MODULAR ACTIVATOR) that regulates the energy liberation through the time, permits an optimal control to increase the availability of more energy sources in the formula, useful for storage, activity and fertility of the sperm.

Improved stability during preservation

FORMULA has been thought to remain more stable and less sensible to physical-chemical changes in relation to common diluents over time, as component osmolarity, temperature and humidity changes.

Certification ISO 9001:2008
Product under Quality and security standards
Continuous improvement in product process control and quality
Buffered salt and process under strict control
Pharmaceutical grade raw materials
Made in Italy;

FORMULA REGULATES THE SPERMATIC METABOLISM DURING THE PRESERVATION AND PROVIDES ENERGY FOR THE FERTILIZATION

STABLE CHEMICAL-PHYSICAL ENVIRONMENT THROUGH THE TIME

FORMULA contains an efficient combination of selected antibiotics that guarantees the elimination of bacterial contamination, indispensable for a good doses preservation.

NEW TECHNOLOGY OF CONTROLLED ENERGY RELEASE

The presence of a new component (MODULAR ACTIVATOR), that regulates the energy liberation through the time, permits an optimal control to increase the availability of more energy sources in the formula, useful for storage, activity and fertility of the sperm.

IMPROVED STABILITY DURING PRESERVATION

FORMULA has been thought to remain more stable and less sensible to physical-chemical changes in relation to common dilutors over time, as component oxidation, temperature and humidity changes.

Do not contain substances of animal origin
Do not contain tensoactives
Do not produce foam

The FORMULA extends product line has been realized with patented technology. This is the result of a collaboration between Medi Nova’s R&D department and the Departments of Pharmacy and Veterinary Sciences of University of Parma.

FORMULA: MODULATED ENERGY = BEST PERFORMANCE
FORMULA, an advanced technology that improves performance thanks to an innovative modulated energy source.

FORMULA REGULATES THE SPERMATIC METABOLISM DURING THE PRESERVATION AND PROVIDES ENERGY FOR THE FERTILIZATION

STABLE CHEMICAL-PHYSICAL ENVIRONMENT THROUGH THE TIME
FORMULA contains a stable chemical-physical environment that is maintained throughout the preservation process, ensuring optimal conditions for spermatozoa viability.

NEW TECHNOLOGY OF CONTROLLED ENERGY RELEASE
The presence of a new component (MODULAR ACTIVATOR) that regulates the energy liberation through time, permits an optimal control to increase the availability of more energy sources in the formula, useful for storage, activity and fertility of the sperm.

IMPROVED STABILITY DURING PRESERVATION
FORMULA has been designed to remain more stable and less sensible to physical-chemical changes in relation to common dilutors over time, as component oscillation, temperature and humidity changes.

Do not contain substances of animal origin
Do not contain preservatives
Do not produce foam

The FORMULA extender product line has been realized with patented technology. This is the result of a collaboration between Medi Nova’s R&D department and the Departments of Pharmacy and Veterinary Sciences of University of Parma.

FORMULA has been thought to remain more stable and less sensible to physical-chemical changes in relation to common dilutors over time, as component oscillation, temperature and humidity changes.

MEDI NOVA FORMULA
Boar semen extender
FORMULA 3
RELEASES ENERGY TO THE FECUNDATION

FORMULA 5
BREAK-EVEN POINT IN YOUR ARTIFICIAL INSEMINATION PROGRAM

FORMULA 8
SEMEN QUALITY AND LENGTH GUARANTEE BY A NEW AND INNOVATIVE MODULATED ENERGY SOURCE

FORMULA 12
THE FUNCTIONAL MODULATOR ACTION SHOWS ITS MAXIMUM POTENTIAL IN A VERY LONG TERM STORAGE

- PRACTICAL AND USER FRIENDLY
- PHYSICAL-CHEMICAL CONSTANT ENVIRONMENT FOR THE SEMEN
- NEW ANTIBACTERIAL COMBINATION
- CONTROLLED EMISSION OF THE ENERGY
- CHEMICAL-PHYSICAL CONSTANT ENVIRONMENT ALONG THE TIME
- HIGH-EFFICIENCY ANTIBACTERIAL COMBINATION
- PRACTICAL AND USER FRIENDLY
- CONTROL OF AVAILABLE ENERGY THROUGH A MODULAR ACTIVATOR
- MAIZE TO INCREASE THE STABILITY AGAINST THE SPERM METABOLITE PRODUCT
- ANTIBACTERIAL LONG TERM ACTION
- IMPROVES THE STRENGTH OF SPERM MEMBRANE PROTECTING IT FROM THE LOW TEMPERATURES
- ITS BIOTECHNOLOGY IMPROVES THE PERFORMANCES OF THE SEMEN, SINCE AN INNOVATIVE SYSTEM ALLOWS A CONTROL RELEASE OF THE AVAILABLE ENERGY SOURCE
- BUFFER CAPABILITY TO GUARANTEE OPTIMUM pH AND OSMOLARITY THROUGHOUT THE TIME
- ANTIBACTERIAL OPTIMIZATION ACTIVITY
- IMPROVES THE ACTIVITY AND FERTILITY OF THE PRESERVED SPERM
LONG TERM EXTENDER
UP TO 12 DAYS

MEDIUM TERM EXTENDER
UP TO 5 DAYS

SHORT TERM EXTENDER
UP TO 3 DAYS

FORMULA 3
RELEASES ENERGY TO THE FERTILIZATION

FORMULA 5
BREAK-EVEN POINT IN YOUR ARTIFICIAL INSEMINATION PROGRAM

FORMULA 8
SEMEN QUALITY AND LENGTH GUARANTEED BY A NEW AND INNOVATIVE MODULATED ENERGY SOURCE

> PRACTICAL AND USER FRIENDLY
> PHYSICAL-CHEMICAL CONSTANT ENVIRONMENT FOR THE SEMEN
> NEW ANTIBACTERIAL COMBINATION

> CONTROLLED EMISSION OF THE ENERGY
> CHEMICAL-PHYSICAL CONSTANT ENVIRONMENT ALONG THE TIME
> HIGH-EFFICIENCY ANTIBACTERIAL COMBINATION
> PRACTICAL AND USER FRIENDLY

> CONTROL OF AVAILABLE ENERGY THROUGH A MODULAR ACTIVATOR
> MADE TO INCREASE THE STABILITY AGAINST THE SPERM METABOLIC PRODUCT
> ANTIBACTERIAL LONG TERM ACTION
> IMPROVES THE STRENGTH OF SPERM MEMBRANE PROTECTING IT FROM THE LOW TEMPERATURES

> ITS BIO-TECHNOLOGY IMPROVES THE PERFORMANCES OF THE SEMEN, SINCE AN INNOVATIVE SYSTEM ALLOWS A CONTROL RELEASE OF THE AVAILABLE ENERGY SOURCE
> BUFFER CAPABILITY TO GUARANTEE OPTIMUM PH AND OSMOLARITY THROUGHOUT THE TIME
> ANTIBACTERIAL OPTIMIZATION ACTIVITY
> IMPROVES THE ACTIVITY AND FERTILITY OF THE PRESERVED SPERM
LONG TERM EXTENDER
UP TO 12 DAYS

MEDIUM TERM EXTENDER
UP TO 5 DAYS

SHORT TERM EXTENDER
UP TO 3 DAYS
